Professional Summary

Fourth-year BSc (Hons) Computer Science student at the University of Jaffna with strong interests in Software Engineering, Artificial Intelligence, Machine Learning, Networking, and Cyber-security. Skilled in Python, data structures, algorithms, full-stack development, and computer networking. Passionate about building scalable software, intelligent systems, and secure network solutions while contributing to innovative, technology-driven environments.

Education

BSc Hons in Computer Science

2022 – Present

University of Jaffna, Sri Lanka

GPA: 3.78 / 4.00

Technical Skills

- **Programming Languages:** Python, Java, JavaScript, PHP, SQL, C++
- **Frontend:** React.js, React Native, HTML, CSS, Axios
- **Backend:** Node.js, Express.js, Laravel, Flask
- **Databases:** MySQL, MongoDB
- **Libraries & Tools:** Scapy, PyTorch, TensorFlow
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux (Ubuntu), Windows
- **Other Tools:** Postman, VS Code, Cisco Packet Tracer

Projects

Centralized Livestock Monitoring and Governance System

2025

React.js, Node.js, Express.js, MongoDB, Axios

GitHub: [Link](#)

- Led development of a full-stack platform for hierarchical access and secure data management.
- Built RESTful APIs using Node.js and Express.js with MongoDB for efficient client-server communication.
- Developed dashboards for multi-level authorities and presented the solution to the government client.

Network Bandwidth Usage Monitoring System

2026

React, Python, Flask, Scapy

GitHub: [Link](#)

- Designed a real-time LAN monitoring tool for connected devices and bandwidth tracking.
- Built a Python Flask backend with Scapy integrated with a React dashboard for visualization.
- Managed task distribution and ensured system reliability under varying network conditions.

Complaint Management System

2024

Laravel, MySQL, PHP, HTML, CSS, JavaScript

GitHub: [Link](#)

- Developed full-stack web application with role-based access control for multiple user roles.
- Implemented OTP-based password reset, complaint submission with image upload, and location tracking.
- Responsible for frontend and backend development, debugging, and functionality validation.

Research

Reinforcement Learning-Based Adaptive Network Intrusion Detection System 2024

– *Present*

Python, PyTorch

- Designing a Deep Q-Network-based adaptive NIDS for real-time cyber threat detection.
- Developing a reinforcement learning framework trained on NSL-KDD and CICIDS2017 datasets.
- Following modular design, version control, and iterative development practices.

Certifications

- Responsive Web Design – freeCodeCamp
- JavaScript Algorithms and Data Structures – freeCodeCamp
- Front-End Development Libraries – freeCodeCamp
- Scientific Computing with Python – freeCodeCamp
- Data Analysis with Python – freeCodeCamp
- AI/ML Engineer Stage 1- SLIIT
- AI/ML Engineer Stage 2- SLIIT

Volunteering

First Year Representative, The Computer Society (CompSoc), University of Jaffna 2022 – 2023
